Regular State employees subject to promotion/demotion policy

Essential Functions: Responsible for technology infrastructure and services to include architecture, integration, data networks, enterprise servers, operating systems and databases, and data center operations.

- Plans, designs, implements and maintains a high performing technology infrastructure that will support the Judiciary's existing enterprise systems and the growing portfolio of products, services and applications.
- Provides direction oversight and coordination to the Infrastructure team by supervising development, recruitment and retention of staff.
- Oversees capacity and performance management for all processing and network functions.
- Oversees the daily activities of the data center.
- Works with senior management, sets technical direction, including IT standards and policies, for the successful implementation of large-scale initiatives through the effective use of information technology.
- Interfaces with state agencies to coordinate system and network interoperability requirements.
- Performs all other duties as assigned.

Education: Bachelors Degree from an accredited college or university in Computer Science, Information Technology, Business Administration or related field.

Experience: 7 years of IT experience, with 5 years of related experience managing infrastructure services (architecture, platform, operating systems, storage, network, database, or data center management).

Preferred: Master's Degree in Computer Science or Information Technology highly desired. Previous work experience in the area of application development methodology, understanding of SOA, object-oriented analysis and design, and web based and client server systems. Previous work experience with XML-based information exchange concepts, frameworks, and service integration standards and data models supporting enterprise-wide, consistent and repeatable information exchange processes.

Note: Additional work related experience as specified above may be substituted for the education requirement on a year for year basis for up to four years of the required education.

Skills/Abilities:
- Ability to manage and administer IT Infrastructures, including Mainframe, UNIX and Microsoft platforms supporting operating systems, application and database servers and storage, virtualization practices, database management systems (Oracle, SQL Server), network concepts and architecture, system performance testing tools and techniques, system security, high availability and recovery techniques, and data center operations and recovery. Knowledge of system integration and interoperability.
- Ability to lead teams, manage vendors, and to plan, organize, prioritize and deliver IT projects.
- Ability to implement major technology solutions using current and emerging technologies.
- Ability to demonstrate supervisory skills in hiring, managing, developing, leading, motivating and retaining staff.
- Ability to communicate professionally and effectively in writing and verbally.
- Ability to perform all functions of the job.
